

# Cambridge Research Administrator Network

16<sup>th</sup> October 2018

# Welcome and Introduction to Sanger

The Sanger is a world leader in genome research that delivers insights into human and pathogen biology that change science and medicine through:

- Being an 'ideas factory'; conceiving new questions to address through genomics and biological science at scale.
- Driving genomics technology development and implementation.
- Innovating genomic data aggregation and analysis.
- Large-scale DNA sequence and phenotype data production from humans, pathogens and cells.
- Addressing scientific questions underpinning health issues of low and middle income countries.
- Training scientists and clinicians in genome sciences.
- Leading global research initiatives with international partners.
- Being at the centre of a collaborative network of science.

# Welcome and Introduction to Sanger

## Science Programmes

- Cancer, Ageing and Somatic Mutation
- Cellular Genetics
- Human Genetics
- Parasites and Microbes

## Scientific Operations

- DNA Pipelines
- Cellular Operations
- Research Support Facility

## Management Operations

- Grants
- Legal
- Ethics
- Finance
- ICT

# Where the idea came from

- Born out of conversations at this year's INORMS/ARMA conference in Edinburgh, between colleagues from Babraham and Sanger
- Evident that there is a real value in connecting colleagues who are working in research administration roles in Cambridge and the local area
- Colleagues at Sanger have been working on this idea with input from Danielle Hoyle (Babraham)

# Cambridge Research Administrator Network

## Our Mission

Connecting Research Managers and Administrators across Cambridgeshire to share information, celebrate best practices and strengthen relationships.

# Vision for the Cambridge Research Administrator Network

## OVERVIEW

A network to connect Research Managers and Administrators across Cambridgeshire to build and strengthen relationships by sharing information, knowledge, resources and celebrating best practices to support research. The idea is simple – an opportunity for RMAs to engage with each other in the local area. This network will aim to foster relationships and encourage connections.

Cambridge Research Administrator Network has been formed to address a lack of networking opportunities between research managers and administrators in the Cambridge region. The aims of the network are:

- To hold regular meetings between colleagues in academic and charitable research offices
- To share best practice through short presentations, either within the network or from external source
- To discuss current issues in research administration, strengthening relationships for current and future collaborations

# An Effective Network

- How you will benefit from the network
- How your organisation will benefit from the network
- Future Meetings including Schedule and Locations;
  - Quarterly schedule of network events?
  - Would you like to host a session?
- Topics for Network Meetings
- Would there be a benefit to an online forum/group i.e LinkedIn?

# An Effective Network
